

All FIRST Robotics Competition (FRC) high school teams compete to build the best robot and win the competition each March. Beyond this, all robotics teams are different. The L&N STEM Academy team, the STEMpunks, must be very creative in capitalizing on their strengths, which include scientific, technical, and business skills.

In our third year, the L&N STEMpunks have taken on more responsibility as a competitive robotics team. As one of the representative schools of FRC in Knoxville, we spread the word about FIRST Robotics, collaborate closely with other FRC robotics teams, and give back to the Knoxville community.

But our team cannot do it alone. Robotics teaches valuable skills useful for many engineering and business fields, but it also requires tools, parts, and other equipment. We are raising the funds needed to continue to do quality work. This is why we come to you. Your help can enable us to do what we do best: make robots. Our sponsors are very much a part of our team. We do all we can to recognize our sponsors, citing them on our social media and the robot itself, giving much exposure to all of our sponsors locally and regionally.

We hope you will consider sponsoring the L&N STEMpunks, the FRC Robotics team at the L&N STEM Academy, by March 31st. Popular sponsor levels include \$500, \$1,000, \$2,000, \$3,000, and \$5,000 dollars, but we accept donations of all levels.

Thank you for your consideration. We hope to hear from you soon.
